

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

THE PRESENT STATUS AND THE FUTURE
OF HYGIENE OR PUBLIC HEALTH
IN AMERICA¹

CONTENTS

<i>The Present Status and the Future of Hygiene or Public Health in America:</i> DR. W. W. FORD	1
<i>Measurements of the Distances of the Stars:</i> SIR F. W. DYSON	13
<i>Scientific Notes and News</i>	22
<i>University and Educational News</i>	24
<i>Discussion and Correspondence:—</i>	
<i>Editorial Supervision for Experiment Station Publications:</i> FREDERICK A. WOLF. <i>A Simple Technique for the Bacteriological Examination of Shell Eggs:</i> J. E. RUSH....	24
<i>Quotations:—</i>	
<i>The Dismissal of Professor Nearing</i>	26
<i>Scientific Books:—</i>	
<i>Nature and Science on the Pacific Coast:</i> DR. JOHN M. CLARKE. <i>Boulenger's Catalogue of the Freshwater Fishes of Africa:</i> PROFESSOR T. D. A. COCKERELL	27
<i>A Bibliography of Fishes to be Published:</i> PROFESSOR BASHFORD DEAN	32
<i>Special Articles:—</i>	
<i>The Action of Potassium Cyanide when introduced into Tissues of a Plant:</i> WILLIAM MOORE AND A. G. RUGGLES	33
<i>The American Association for the Advancement of Science:—</i>	
<i>Section B—Physics:</i> DR. W. J. HUMPHREYS.	36
<i>The New Orleans Meeting of the American Chemical Society:</i> DR. CHARLES L. PARSONS.	37

MSS. intended for publication and books, etc., intended for review should be sent to Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.

DURING the past few years an increasing and now insistent demand has been heard in this country for better facilities for the training of public health officials. This demand has come from members of the medical profession, chiefly those engaged in official positions as officers or commissioners of health for cities and states, from sanitary engineers, and from various philanthropic societies whose aim is the betterment of social conditions among the poor in our great cities and in our rural communities. With the last this demand is associated with a demand for more enlightened instruction for the general public in matters affecting their health. At this time when these various desires are but an index of the awakening of interest throughout this country in that branch of science known as hygiene or public health, it becomes a matter of vital necessity for those of us who are working in this field to clearly formulate the underlying principles of this science, its scope and its needs, and present them to the public and especially to those who hold the fate of our great institutions of learning in their grasp and under their direction.

HYGIENE IN GERMANY AND AUSTRIA

Despite the fact that an American-born scientist, Count Rumford, of Munich (Benjamin Thompson of Concord and Boston), was the first to inaugurate and carry out a comprehensive movement for
